

Chan Woo (Tony) Park

Product Engineer — developer monetization, Web3 UX, launch systems, AI workflows

Seoul, South Korea · Open to Europe remote / relocation · CET-overlap friendly

LinkedIn: <https://www.linkedin.com/in/tonymfer/> · GitHub: <https://github.com/tonymfer> · X: <https://x.com/tonymfer> ·

Farcaster: @to · ENS: tony.base.eth

Profile

Product engineer with 4+ years building developer- and builder-facing Web3 products at HUNT / Mint Club / Hunt Town. Strongest at turning ambiguous product problems into shipped software: frontend, full-stack prototypes, monetization/launch flows, developer education, and fast iteration with real users. Recent work focuses on Base/Farcaster products, attention/campaign mechanics, and AI-agent development workflows.

Why Polar

Polar is a strong match because my core experience sits close to developer monetization and launch infrastructure: helping builders create, distribute, and monetize software/onchain products. I have built bonding-curve launch flows, token-backed asset UX, staking/rewards surfaces, SDK demos, Base/Farcaster miniapp experiments, and founder-led products where developer experience, monetization, and community adoption all matter.

Relevant Stack

Frontend/product: Next.js, React, TypeScript, Tailwind, shadcn-style UI patterns, Three.js, rapid prototyping

Full-stack/data: Prisma, Postgres, Supabase, REST APIs, Vercel, SQL/data models, integrations, product analytics/debugging mindset

Developer/Web3: Base, Farcaster SDK, MiniKit, wagmi, viem, EVM UX, bonding curves, token-backed assets, NFTs, onchain social, Solana APIs

AI/dev workflows: Claude Code, Hermes, multi-agent development workflows, QA/evidence loops, documentation, issue-to-implementation systems

Experience

HUNT / Mint Club / Hunt Town / Steemhunt — Core Builder / Product Engineer

Oct 2021 – Feb 2026 · Seoul · Full-time / Hybrid

- Core builder across Mint Club, Hunt Town, and Steemhunt; primary professional experience building Web3 product surfaces for builders, creators, and early-stage communities.
- Built frontend/product flows for token-backed assets, bonding-curve launches, NFT/token staking pools, rewards/yield dashboards, cross-chain swap UX, token detail pages, Base/mfer-specific views, and child/sibling token discovery.
- Supported **10+ early-stage projects** with setup, rewards integration, growth mechanics, launch support, and product/community feedback loops.
- Helped move Mint Club into Base/Farcaster through Base token support, MiniKit workshops, SDK demos, miniapp experiments, and onchain social dApp education.
- Public engineering evidence includes **55 commits** as Tony Park / tonymfer across Steemhunt/Mint Club repositories.

Beeper — Co-founder / Product Engineer

Oct 2025 – Present · Seoul / Remote

- Co-founded a Base/Farcaster-native attention product around paid-to-be-read messages, feed missions, targeted campaigns, private sends, and agent-callable communication.
- Owned product/front-end/app-layer execution across consumer UX, Farcaster-native flows, onchain messaging, campaign mechanics, launch loops, and rapid prototyping.
- Reached the **Base Batches 003 interview round — top 120 of 1,170+ teams** — and joined the first Base Founders Residency in Malaysia.

TradeFish — Co-founder / Product Engineer

2026 – Present · Remote

- Won **1st Place at Base Agent Hackathon #1** with TradeFish, a signal-sharing and reputation network for specialized AI trading agents.
- Built product direction around verifiable receipts, transparent track records, agent memory, and safer market-facing AI workflows.

AI Agent Orchestration — Builder / Operator

2026 – Present

- Built a local multi-agent development workflow that turns issues into plans, implementation, QA evidence, documentation, and reusable project memory.

Selected Awards / Hackathons

- **1st Place — Base Agent Hackathon #1** — TradeFish, 2026.
- **1st Place — BNB Chain Hackathon, Lifestyle in Web3** — Chatcasso, Dec 2022; AI-powered NFT wizard.
- **2nd Place — Aptos Seoul Hackathon** — PerSecond, Feb 2023; time-based payment streams on Aptos.
- **4th Place — Superteam Malaysia x Solana Network State Spring '26** — TradeFish, 2026.

Education

Korea University — B.S., School of Biosystem & Biomedical Science · **Codestates** — Blockchain Bootcamp Certificate, 2022
